Pets, they are just like us. They need a cozy bed, good food and, yes, they need gadgets and apps. Bark collars and electric fences are fine, but why stop there when you can get them a collar that lets them tweet? I know. You're confused. Just breathe and read on.

## Clean up after them

Tired of bending over to pick up those warm piles of poop with a plastic bag? With the [Auggiedog Stool Tool](#) (\$149.99 at Auggiedog), you can "vacuum" up droppings, carry them to the nearest toilet or trashcan and immediately dispose of them. This means you won't have to stoop to touch poop again! The handle of this cane-like tool comes equipped with an LED light, just in case you're taking Spot out at night.
